

WHY SIIRT? WHY SIIRT UNIVERSITY?

Siirt, the province in which our university is located, stands out with its affordable living conditions, strong accommodation opportunities, and convenient transportation facilities. The high employment rate of our graduates is an important indicator of the quality of our education, while our internationally accomplished academic staff further strengthens our scientific capacity. In addition to all these advantages, our spacious, green, and aesthetically rich campus offers students a peaceful and productive learning environment.

We warmly invite you to become a member of the Siirt University family.

WHY THE FACULTY OF EDUCATION?

The Faculty of Education offers a strong academic structure through its wide range of programmes, extending from Guidance and Psychological Counselling to Classroom Teaching, Turkish Language Teaching, Social Studies Teaching, English Language Teaching, Mathematics Teaching, and Science Education. With its expert academic staff and commitment to training qualified teachers, the Faculty provides students with a high-quality educational environment.

Through its computer, mathematics, and science laboratories, art workshops, practice classrooms, and various educational facilities, students have the opportunity to reinforce their theoretical knowledge through practice. In addition, double major and double degree opportunities enable students to develop themselves in different fields. Cultural, artistic, and scientific activities that enrich campus life support students' social and professional development. Moreover, accredited programmes prepare graduates for the future with a strong educational background and a high level of competitiveness.

QUALITY EDUCATION, SECURE FUTURE IN THE
LIGHT OF SCIENCE

EMPLOYMENT OPPORTUNITIES

Graduates of the Faculty of Education have broad and diverse employment opportunities thanks to their pedagogical formation, field knowledge, and practical experience. Graduates can primarily work as teachers in public schools affiliated with the Ministry of National Education. In addition, they may find employment in private schools, colleges, course centres, study centres, and special education institutions.

Graduates of the Guidance and Psychological Counselling programme can serve as psychological counsellors in schools, as well as work in counselling centres and various public institutions. Through the practice-oriented education, internships, and school experience processes offered within the Faculty, students gain field experience before graduation, which provides a significant advantage in their transition to employment.

Furthermore, students who develop competencies in different fields through double major and minor opportunities can diversify their career options. The educational process, supported by accredited programmes, a strong academic staff, and modern educational infrastructure, enhances graduates' professional competencies and develops essential skills such as communication, problem-solving, and classroom management.

In this way, graduates can pursue careers not only in teaching but also in areas such as educational consultancy, content development, educational technologies, and academia. The Faculty of Education prepares individuals for professional life not merely as job holders, but as competitive professionals who are open to continuous development and possess a strong sense of social responsibility.

ABOUT

Siirt University Faculty of Education has a long-established history rooted in Siirt Girls' Primary Teacher Training School, which was founded in 1967. The teacher education process continued to develop over time as an Education Institute, a Higher School of Education, and subsequently a Faculty of Education. In 2007, it became part of Siirt University and assumed its current institutional structure. Drawing strength from its deep-rooted history, the Faculty continues to carry out its educational and instructional activities.

About the Faculty

We aim to enlighten individuals by adopting scientific thinking, researching, inquiring, and contributing to society.

- ❑ Mission: To empower individuals who can generate global knowledge and contribute to the advancement of society.
- ❑ Vision: To be a leading faculty in science and education
- ❑ Commitments: Scientific, ethical, inclusivity, active citizenship

Write Your Own Story with the Power of Knowledge!

Since 2007, Siirt University Faculty of Arts and Sciences has offered its students a qualified and multi-faceted higher education environment with academic knowledge and a modern institutional vision.

WHATEVER YOU WANT TO STUDY, WE ARE THERE with **YOU**

You can solve the mysteries of nature with **Biology**, take a journey to the essence of matter with **Chemistry** or learn language of the universe with **Mathematics**. While unfolding the dusty pages of the past with **History**, you can make sense of the world you live in with **Geography**, examine the codes of society with **Sociology**, promote our cultural heritage with **Turkish Language and Literature**, and become a cultural mediator between the communities with **Translation and Interpreting**. But our excitement does not stop there! You will soon delve into the deep roots of human mind and acquire a global vision with **Eastern and Western Languages and Literatures**. Since 2007, we have been providing the very best for you through our constantly evolving infrastructure, dynamic laboratories, and a student-friendly academic team of experts in their fields. When your curiosity meets our expertise, success becomes inevitable. Join us to experience the thrill of science, the elegance of literature, and the profound depth of the social sciences.

Ready to write your own story **with the power of knowledge** in Siirt University Faculty of Arts and Sciences?

STUDENT LIFE and OPPORTUNITIES

Design your dream, shape
your future here!

The Faculty of Fine Arts and Design offers a strong option for students who want to shape their future and create impactful projects. In disciplines such as **Urban and Regional Planning, Landscape Architecture, and Architecture**, a wide range of educational opportunities awaits you, from **designing sustainable cities and creating aesthetically pleasing and functional structures to developing innovative spatial solutions in harmony with nature**. By gaining both theoretical knowledge and practical skills under the guidance of expert academic staff, you can become one of the pioneering individuals designing the cities and living spaces of the future. Here, you will not only acquire a profession but also gain a vision that will change your perspective on the world.

FACULTY OF FINE ARTS AND DESIGN

Dear Students,

Siirt University Faculty of Fine Arts and Design was established in 2017 and started providing education in the 2018-2019 academic year. The faculty has undergraduate departments in Architecture, Landscape Architecture, and Urban and Regional Planning. In addition, postgraduate programs are conducted in the fields of Urban Design and Landscape Architecture. With our workshop and studio facilities, exhibition areas, practical training opportunities, and strong academic staff, we are preparing you, the new generation, for the future.

WHY SIIRT? – WHY SIIRT UNIVERSITY?

The province of Siirt, where our university is located, stands out for its affordable cost of living, strong accommodation options, and easy accessibility. The high employment rate of our graduates is a significant indicator of our educational quality, and our academic staff — who have achieved international recognition — reinforce our scientific strength. In addition to all these advantages, our spacious, green, and aesthetically rich campus offers students a peaceful and productive learning environment.

We look forward to welcoming you as a member of the Siirt University family.

WHY THE FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCES?

With its interdisciplinary approach to education, our faculty trains well-equipped graduates in the fields of Social Work, Economics, Political Science and Public Administration, and Finance. Graduates can pursue careers in areas such as district governorship, judgeship, auditing, inspectorship, specialist positions, banking, and financial consultancy. They may also continue their academic careers through postgraduate study opportunities.

ABOUT

The Faculty of Economics and Administrative Sciences began its educational activities in the 2013–2014 academic year with the Departments of Economics and Business Administration. The Department of Finance began accepting students in 2015–2016, Political Science and Public Administration in 2019–2020, and Social Work in 2020–2021. Having graduated its first cohort in 2017, the Faculty has been producing graduates from all departments as of the 2023–2024 academic year. All departments admit students based on the Equal Weight (EA) score type.

WHY SIİRT? - WHY SIİRT UNIVERSITY?

Siirt offers affordable living, good accommodation options, and easy transportation. Our graduates' high employment rate reflects the quality of our education, while our internationally successful academic staff strengthens our research and academic standing. Our large, green, and beautiful campus also provides students with a peaceful and productive learning environment. We invite you to become part of the Siirt University family.

WHY FACULTY OF THEOLOGY

The Faculty of Theology at Siirt University stands out with its Arabic preparatory program, which provides students with a strong foundation at the beginning of their academic journey. Led by expert instructors with strong pedagogical skills and extensive academic experience, the program aims to teach Arabic not only as a language but also as a key to the Islamic scholarly tradition. Supported by modern teaching methods, the preparatory education enables students to understand both classical and contemporary texts. Our faculty offers a high-quality, interdisciplinary learning environment across a wide range of fields, from Qur'anic Exegesis and Hadith to Islamic Theology and Islamic Law, and from Islamic History to the Psychology of Religion.

ABOUT

Our faculty was established by the decision of the Council of Ministers dated 16 December 2011 and numbered 2605. It was approved that three departments and their academic disciplines would be opened within the faculty. The faculty began education in the 2013–2014 academic year with 203 students. Following the preparatory year, the four-year undergraduate program is delivered by a strong academic staff who are experts in their fields, distinguished by their scholarly work, and committed to a student-centered approach.

AS THE FACULTY OF ENGINEERING;

We educate our students with a strong vision, innovation, and technology-oriented approach; we equip them to become individuals capable of changing the world. With our student-centered approach, we train engineers who can adapt to the requirements of the era, are research-oriented, ethical, and capable of analytical thinking.

With our value-oriented R&D approach, we transform knowledge from the laboratory into societal benefit by transferring it to the field, and we develop our students as innovative and productive individuals. We provide real-world experience through industry collaborations, internship opportunities, and international programs.

Through project-based education, our students gain experience by actively participating in TEKNOFEST, project markets, and TÜBİTAK projects; they acquire competencies in artificial intelligence, digital transformation, and sustainability. With our strong laboratory infrastructure, we train our students to become both technically competent and conscious engineers.

Our aim is to educate engineers who turn dreams into reality and create value for society.

FACULTY OF ENGINEERING

*I am an engineer, serving
humanity by turning dreams
into reality.*

OUR DEPARTMENTS

- ▶ Computer Engineering
- ▶ Electrical and Electronics Engineering
- ▶ Food Engineering
- ▶ Civil Engineering
- ▶ Chemical Engineering
- ▶ Mechanical Engineering

COMPUTER ENGINEERING

The Department of Computer Engineering offers a strong, application-oriented engineering education for students who aim to shape the technologies of the future. While transforming their theoretical knowledge into projects in modern laboratories, our students gain competencies in artificial intelligence, machine learning, deep learning, and large language models.

Our students, who develop projects in software development, data science, computer vision, and intelligent systems, gain experience through TEKNOFEST, project markets, and TÜBİTAK projects, and obtain career advantages before graduation through internships and industry collaborations.

We welcome all students who aspire to shape the future by creating technology to our department.

ELECTRICAL-ELECTRONICS ENGINEERING

Electrical and Electronics Engineering has demonstrated its strong preferability by reaching a 100% occupancy rate in the 2025 YKS placements. In addition to undergraduate education, master's and doctoral programs are also offered.

The department provides education in areas such as energy, communication, robotics, and artificial intelligence, while covering current topics like IoT, 5G, and intelligent systems. Students take an active role in TEKNOFEST, project markets, and TÜBİTAK projects; they gain experience through internships and industry collaborations.

Graduates find career opportunities in leading institutions such as ASELSAN, TUSAŞ, and BAYKAR. We welcome candidates who want to have a say in the technologies of the future to our department.

MECHANICAL ENGINEERING

Mechanical engineering is an analytical engineering discipline that focuses on the design, analysis, and production processes of energy conversion and mechanical systems, offering a wide range of career opportunities in sectors such as automotive, energy, defense, and R&D.

Our department aims to equip students with a scientific perspective, analytical thinking, and mathematical reasoning. It educates well-qualified individuals in areas such as renewable energy, advanced materials and manufacturing technologies, energy efficiency, AI applications, and alternative fuels.

With our competent academic staff, we prepare students as qualified engineers with strong teamwork and communication skills.

CIVIL ENGINEERING

The Department of Civil Engineering stands out with its strong academic staff and application-oriented education. Education is provided in areas such as hydraulics, geotechnics, transportation, construction materials, and earthquake engineering; theoretical knowledge is transformed into practice through the Structural Inspection Laboratory.

Through TÜBİTAK 1001 and 3501 projects, internships, and industry collaborations, students gain experience; our graduates obtain strong career opportunities in infrastructure and superstructure projects in both the public and private sectors. We welcome candidates who want to build the cities of the future to our department.

CHEMICAL ENGINEERING

Chemical engineering is a dynamic field that develops technology by integrating mathematics, chemistry, and biology, and produces solutions to environmental problems. By integrating with biotechnology, it contributes to areas such as renewable energy, water treatment, and sustainable production.

In our department, education is provided in current fields such as catalysis, hydrogen and green synthesis, algotechnology, and polymer-membrane technologies; students develop through a multidisciplinary approach. Our graduates work in R&D, production, and management in sectors such as petrochemicals, food, cosmetics, textiles, pharmaceuticals, energy, and defense. We welcome all candidates who aim to develop the sustainable technologies of the future to our department.

*FOOD ENGINEERING

The Department of Food Engineering stands out with its strong academic staff and application-oriented education. Education is provided in areas such as food processing, microbiology, chemistry, and quality control; food safety is learned in practice through modern laboratories.

Students gain experience in production and quality processes, and support their professional development through internship opportunities. Our graduates begin their careers in production facilities, quality control laboratories, and R&D centers. We welcome candidates who want to contribute to safe and sustainable food production to our department.

* There are currently enrolled students in the program; however, it is not included in the preference list in the ÖSYM 2025–2026 placement guide.

Highlights

- Student-centered approach
- Competent academic staff in their field
- Application-oriented learning
- Ethical responsibility and social contribution

Long History

The institution, whose origins lie in the School of Health opened in 1963, has been providing education as the Faculty of Health Sciences since 2020, following its experience as a Vocational High School of Health Sciences and a College of Health Sciences.

A scientific and application-oriented structure that prepares its students for the future.

Why Siirt University Faculty of Health Science?

- Corporate experience
- Society-focused approach
- Balance of professional knowledge and ethical responsibility

Departments

Nursing Department

The Nursing Department focuses on the protection and improvement of individual, family, and community health, as well as the effective conduct of patient care and treatment processes. In addition to undergraduate education, it also offers postgraduate education opportunities.

Occupational Health and Safety

The Occupational Health and Safety Department provides expertise in creating safe working environments, preventing work accidents and occupational diseases, protecting employee health, and developing a sustainable safety culture.

An academic structure that supports scientific development alongside undergraduate education.

WHY STUDY MEDICINE AT SIİRT UNIVERSITY?

Our faculty provides students with a strong professional foundation through an educational model that integrates theoretical knowledge with clinical practice, well-equipped laboratories, and a training hospital. During their education, our students have the opportunity to develop their clinical skills by interacting with patients from an early stage. Thanks to our structure that encourages scientific research, our students take an active role in national and international projects while benefiting from seminars, congresses, and internship opportunities that support their academic development. Our educational environment, supported by modern campus facilities and social and cultural activities, contributes to both the professional and personal development of our students. Our faculty is committed to educating qualified and well-equipped physicians for the healthcare sector.

the future of health together**

EMPLOYMENT OPPORTUNITIES

Faculty of Medicine graduates have broad and strong employment opportunities in the healthcare sector. Graduates can work as general practitioners in state hospitals, university hospitals, and private hospitals.

After completing residency training (TUS - Specialty Examination in Medicine), graduates can work as medical specialists in various fields. Additionally, there are opportunities in family medicine, to open private clinics, working in research centers, and pursuing an academic career.

Since the faculty offers integrated education with hospitals within the scope of cooperation with the Ministry of Health, graduates are well prepared for their professional careers by gaining strong practical experience.

CAREER OPPORTUNITIES

Career opportunities include academic careers; ministries related to agriculture, animal husbandry, health, or the environment; private clinics; municipalities; slaughterhouses; integrated livestock enterprises; farms; animal product processing facilities such as meat and dairy plants; research institutes; diagnostic laboratories; feed mills; pharmaceutical, vaccine, and biological product manufacturing facilities; and retail markets. In addition, graduates may directly proceed to doctoral programs after graduation.

Not just education, build your future.

WHY SIİRT UNIVERSITY FACULTY OF VETERINARY MEDICINE?

Through the Animal Health Application and Research Center Providing Clinical Education at European Standards;

Our hospital, in compliance with the standards of the European Association of Establishments for Veterinary Education (EAEVE), is one of the largest in the region and among the limited number of distinguished animal hospitals in Türkiye. With its modern infrastructure covering 8,300 m², it offers students a wide variety of clinical cases and hands-on training opportunities through its emergency, companion animal, exotic animal, equine, and ruminant outpatient clinics, as well as departments of surgery, internal medicine, obstetrics and gynecology, and reproduction.

Supported by a strong technical infrastructure including radiology, a central laboratory, and necropsy units, students are able to develop their clinical skills at an early stage and gain the opportunity to become professionally competent before graduation.

The educational process aims to train well-equipped veterinarians by instilling a commitment to scientific and ethical principles and fostering awareness of providing reliable healthcare services.

Through collaborations and projects carried out with public institutions, students gain field experience and actively participate in activities related to animal health and welfare.

→ The Right Address for Future Veterinarians

- Since 2018, Siirt University—**designated as a Specialized University in the Field of Agriculture and Animal Husbandry**—has been preparing its students for the profession in the most competent manner through the strong academic structure and practice-oriented educational approach offered within its Faculty of Veterinary Medicine.

→ Strong Academic Staff

- A large academic staff consisting of **11 Professors, 10 Associate Professors, 24 Assistant Professors, and 17 Research Assistants** who are experts and experienced in their fields.
- A contemporary and innovative educational approach in line with current scientific developments.
- A student-centered educational model that promotes one-to-one interaction and an active learning environment.
- A strong academic atmosphere that encourages academic productivity and focuses on continuous development and research.

→ Leading Centers in Science and Research

- Our faculty stands out with research centers specialized in various fields:
- **Reproductive Biotechnology Application and Research Center**
 - Pioneering scientific studies in its field in Türkiye
- **Beekeeping Application and Research Center**
 - Contribution to regional development and scientific projects
- **Experimental Animals Application and Research Center**
 - Advanced research opportunities with modern infrastructure
- **Small and Large Ruminant Breeding Center**
 - Field experience and production-based education
- **Wildlife Protection, Rehabilitation Application and Research Center**
 - Studies on natural life, conservation, and wildlife

Modern Laboratory Infrastructure

- Well-equipped laboratories belonging to 13 departments.
- Opportunities for practical training and research.
- A strong technical infrastructure that supports scientific productivity.

Siirt University Faculty of Veterinary Medicine
A place where science, practice, and experience come together...

WHY SIİRT? | WHY SIİRT UNIVERSITY?

Located in the city of Siirt, Siirt University offers an affordable cost of living, excellent accommodation opportunities, and convenient transportation. Our high graduate employment rate reflects the quality of our education, while our internationally recognized academic staff strengthens our reputation for excellence in research and innovation. In addition, our spacious, green, and modern campus provides a peaceful and inspiring environment for learning and personal development. We warmly invite you to become a valued member of the Siirt University family.

WHY THE FACULTY OF AGRICULTURE?

The Faculty of Agriculture at Siirt University provides high-quality education through modern laboratories, field and greenhouse practices, hands-on courses, and a project-based learning approach, preparing students for scientific and sustainable agriculture. As a university specialized in agriculture and livestock, Siirt University stands out with its strong research infrastructure, innovative projects, and close collaboration with industry. Supported by a highly qualified academic staff, students benefit from both theoretical knowledge and practical experience. In addition, internationalization initiatives and student exchange programs offer valuable academic and intercultural opportunities, preparing graduates for successful careers in a globalized world.

ABOUT

Established in 2012, the Faculty of Agriculture at Siirt University is committed to advancing regional agriculture through high-quality education, scientific research, and practical training. With its distinguished academic staff, modern laboratories, field facilities, and greenhouse applications, the Faculty provides students with a comprehensive and practice-oriented learning experience.

The Faculty conducts research in key areas such as Siirt pistachio, sustainable agriculture, plant health, and biological control. Supported by projects funded by TÜBİTAK and the University's Scientific Research Projects (BAP) program, the Faculty promotes scientific innovation while emphasizing internationalization and hands-on education.

Our School

Siirt University School of Physical Education and Sports (BESYO) aims to train individuals who possess the knowledge, skills, and competencies required by sports sciences. With its expert academic staff, modern facilities, and a dynamic educational approach, it offers a contemporary academic environment. The Coaching Education, Physical Education and Sports Teaching, and Sports Management programs not only provide professional training but also contribute to the development of individuals who are committed to universal values, open to innovation, socially responsible, and productive. Our school continues to take progressive steps toward the future with its achievements in both national and international competitions, scientific studies, and social responsibility projects. It advances with the vision of disseminating sports culture through collaborations with stakeholders in the field of sports.

Our Departments

Physical Education and Sports

This program aims to provide students with the necessary teaching competencies to deliver physical education courses in schools. Graduates have the opportunity to work as physical education teachers at primary, secondary, and high school levels. Additionally, the program offers career opportunities in coaching and sports management.

Coaching Education

The Coaching Education program equips students with the technical and strategic knowledge required to develop athletes both physically and mentally. Graduates can work as coaches in amateur and professional sports teams, provide private coaching services, and pursue teaching careers in educational institutions.

Sports Management

Sports Management programs aim to equip students with the skills necessary to manage and operate sports organizations. Graduates can work in managerial or administrative positions in sports teams, sports organizations, sports facilities, and sports federations.

Career Opportunities for Our Graduates

- As managers, practitioners, and professionals in public institutions, enterprises, and facilities recruiting personnel through the relevant Public Personnel Selection Examination score;
 - As managers in sports facilities and related units;
 - As practitioners in recreation services departments of local governments;
 - As specialists within the General Directorate of Youth and Sports;
 - As support staff in gerontology departments of public, university, and private hospitals;
 - As animation managers and practitioners in tourism facilities, recreational facilities, and holiday resorts;
 - As recreation instructors in special education centers.
-
- Gastronomy professionals in restaurants, hotels, and other establishments serving food, beverages, entertainment, and accommodation within the tourism, travel, and transportation sectors;
 - Professionals in product development departments of food businesses;
 - Managers, supervisors, designers, and practitioners in educational institutions;
 - Professionals in visual and print media organizations;
 - Entrepreneurs who establish and manage their own businesses;
 - Academics and educators in their respective fields.
 - Depending on their skills and qualifications, graduates may also have opportunities to pursue careers abroad.

School of Tourism and Hotel Management

Siirt University – Kezer Campus

Faculty of Theology Building,
Ground Floor Siirt, Türkiye

Siirt *Bilimin Işığında*
ÜNİVERSİTESİ

**School of Tourism
and Hotel
Management**

School of Tourism and Hotel Management

The School of Tourism and Hotel Management was established at Siirt University on 25 May 2015 pursuant to Additional Article 30 of Law No. 2809, dated 28 March 1983. Following the approval of the Council of Higher Education, as stated in its letter dated 19 December 2018 and numbered 6004, the Department of Recreation Management was established within the School, becoming its first department.

The primary aim of the School is to educate students and prepare qualified future managers for the tourism industry, encourage entrepreneurship, and create value for all stakeholders by developing projects that respond to the needs of the sector.

The School is currently located on the ground floor of the Faculty of Theology building. It currently employs **three Associate Professors, three Assistant Professors, two Lecturers, two Research Assistants, and four administrative staff members.**

Department of Recreation Management

The primary aim of the Department of Recreation Management is to educate qualified professionals equipped with theoretical and practical knowledge in the fields of tourism and recreation, proficiency in two foreign languages—English and Russian—and strong analytical thinking skills.

The department has admitted students based on the verbal score type since the 2019–2020 academic year. The language of instruction is Turkish, and the four-year undergraduate program is supported by English-language instruction. Russian is offered as a second foreign language. In order to receive their undergraduate degree, students must successfully complete all courses offered over eight semesters and complete a compulsory 45-working-day internship at tourism and/or recreation enterprises in Türkiye or abroad.

With its expert academic staff consisting of **two Associate Professors, one Assistant Professor, one Lecturer, and one Research Assistant**, the Department of Recreation Management achieved a 100% occupancy rate for its quota of 40 students in the 2025–2026 academic year.

Department of Gastronomy and Culinary Arts

The Department of Gastronomy and Culinary Arts began offering education in the 2022–2023 academic year with an annual quota of 40 students. The language of instruction is Turkish, and students are admitted based on the verbal score type of the university entrance examination. The department offers a four-year undergraduate program consisting of eight semesters. During the first two years, students receive six hours of Basic English instruction per week. During the final two years, students have the opportunity to learn a second foreign language, such as German or Russian.

The curriculum includes courses such as Food History, Introduction to Culinary Arts, Basic Culinary Techniques, and Food Technology. Students also receive education in food presentation, pastry and dessert production, bakery and dough products, world cuisines, regional cuisines, and restaurant management. The educational process combines theoretical knowledge with practical skills. Beginning in their second year, students complete a total of 45 working days of compulsory summer internship training.

The department currently has **one Associate Professor, two Assistant Professors, one Lecturer, and one Research Assistant.**

WHY SIİRT? – WHY SIİRT UNIVERSITY?

Located in the city of Siirt, our university stands out with its affordable cost of living, strong accommodation opportunities, and convenient transportation. The high employment rate of our graduates is a significant indicator of the quality of education we provide, while our distinguished academic staff, recognized for their international achievements, further strengthens our academic excellence. In addition to these advantages, our spacious, green, and aesthetically designed campus offers students a peaceful and productive learning environment.

We warmly invite you to become a member of the Siirt University family.

WHY THE SCHOOL OF FOREIGN LANGUAGES?

Siirt University School of Foreign Languages is an important academic unit that enables students to acquire the foreign language skills they will need in their academic and professional lives. Through preparatory programs and compulsory foreign language courses, students' reading, writing, listening, and speaking skills are systematically developed. In addition, programs such as Translation and Interpreting support the professional and practical use of foreign languages. Thanks to its student-centered educational approach, practical courses, and opportunities to prepare for international examinations, the School aims to educate students as individuals who are well-equipped to adapt to the global world and possess strong communication skills. The School of Foreign Languages aims to provide students with a solid foundation in foreign languages, support their academic success, and enhance their future career opportunities.

SCHOOL OF FOREIGN LANGUAGES

"A strong foundation in English, a confident step toward the future."

CAREER PROSPECTS

The education provided at Siirt University School of Foreign Languages equips students with strong foreign language proficiency and offers them a wide range of employment opportunities across various sectors. In particular, students who receive training in English Translation and Interpreting can find career opportunities in written and oral translation, public institutions, international companies, the tourism sector, media organizations, and foreign trade. In addition, graduates who wish to continue their academic development can pursue an academic career through postgraduate education or pursue careers in fields such as teaching. The preparatory education provided at the School contributes to students becoming competitive individuals in the global labor market by improving their language proficiency. Furthermore, international exchange programs such as Erasmus+ support students in enhancing their career opportunities by providing them with valuable international experience.

FIELDS OF STUDY

Department of English Translation and Interpreting

Our School's Department of English Translation and Interpreting began admitting students for the first time in the 2016–2017 academic year. The Department of English Translation and Interpreting has three assistant professors, three lecturers, and one instructor. This undergraduate program includes a compulsory preparatory year. Students in the preparatory classes receive 25 hours of instruction per week. Students who successfully pass the proficiency examination held at the end of the preparatory year are eligible to enroll in the first year of the undergraduate program.

DEPARTMENT OF FOREIGN LANGUAGES

The Department of Foreign Languages at Siirt University is an academic unit that aims to develop the foreign language skills students will need in their academic and professional lives. Through preparatory programs and foreign language courses, students acquire reading, writing, listening, and speaking skills in an integrated manner. The educational process is supported by practical activities through an expert academic staff and a student-centered approach. The Department aims to educate students as individuals who are capable of communicating internationally and adapting to the global world.

ABOUT US

Founded in 2014, our School consists of Modern Languages, the Preparatory Program, and the Courses Coordination Office. The Department of English Translation and Interpreting, established in 2015, welcomed its first students in 2016 and successfully produced its graduates before being transferred to the Faculty of Science and Letters in 2023. Today, our four dedicated instructors provide intensive English preparatory education. With at least 20 hours of weekly classes, students build a strong language foundation and transition to their undergraduate studies upon passing the proficiency exam.

ABOUT

The Vocational School of Health Services is an educational institution dedicated to training qualified healthcare professionals. The school includes the Departments of Medical Services and Techniques, as well as Therapy and Rehabilitation. In addition to theoretical education, students are provided with laboratory and practical training opportunities to develop their professional skills.

WHY CHOOSE SİİRT? - WHY SİİRT UNIVERSITY?

Siirt, the home of our university, stands out for its affordable cost of living, robust housing options, and easy accessibility. The high employment rate of our graduates serves as a key indicator of our educational quality, while our internationally recognized faculty reinforces our academic excellence. In addition to all these advantages, our spacious, green, and aesthetically rich campus provides students with a peaceful and productive learning environment. We look forward to welcoming you as a member of the Siirt University family.

WHY THE VOCATIONAL SCHOOL OF SOCIAL SCIENCES?

With an educational approach rooted in universal knowledge, technology, and scientific thinking, the Vocational School of Social Sciences aims to align students' interests and talents with professional competencies. By offering a participatory, collaborative, and contemporary learning environment, it raises qualified individuals who are responsive to societal needs, appreciate aesthetic values, and adapt effectively to professional life. Contributing significantly to the region's demand for a skilled workforce, the school provides its students with a solid educational foundation for a strong professional future.

ABOUT US

Siirt Vocational School was established in the 2002-2003 academic year under Dicle University. Following its affiliation with Siirt University in 2007, the school experienced rapid growth in both its number of departments and student body. To provide higher quality education and services, Siirt Vocational School was restructured into two distinct institutions in the 2014-2015 academic year: the Vocational School of Social Sciences and the Vocational School of Technical Sciences.

WHY SIIRT? - WHY SIIRT UNIVERSITY?

The city of Siirt, where our university is located, stands out with its affordable living conditions, strong housing options, and easy accessibility. The high employment rate of our graduates is a significant indicator of the quality of our education, and our academic staff, who have achieved international success, reinforce our scientific strength. In addition to all these advantages, our spacious, green, and aesthetically pleasing campus offers our students a peaceful and productive learning environment. We look forward to welcoming you to the Siirt University family.

WHY DESIGN VOCATIONAL SCHOOL?

The Vocational School of Design trains designers ready for the industry with its creative, innovative, and application-oriented educational approach. With its expert staff, modern studios, and industry collaborations, it offers our students a high-quality learning process. Our aim is to produce individuals with an understanding of aesthetic, functional, and sustainable design. Our Vocational School is one of only five Vocational Schools of Design in our country.

The Vocational School of Design views design not merely as a profession, but as a way of thinking and producing. During their education, our students experience active learning through workshops where they transform their ideas into projects, digital design applications, and real-world problem scenarios. This process develops not only their technical skills but also their problem-solving, user-understanding, and design process management competencies.

DEPARTMENT OF DESIGN

Interior Design Program

COMPUTER TECHNOLOGIES DEPARTMENT

Computer-Aided Design and Animation Program
(NEWLY LAUNCHED PROGRAM)

Interior Design is an associate degree program that trains individuals to design architectural interiors using an interdisciplinary approach that is functional and meets user needs. The first year of the program focuses on developing students' creativity, drawing, and 2D and 3D thinking skills. The second year aims to provide professional knowledge and skills through courses in aesthetic sensitivity, technological knowledge, technical drawing, and presentation techniques.

Graduates of the Interior Design associate degree program can apply for transfer to the following 4-year bachelor's degree programs:

- Architecture
- Interior Architecture
- Interior Architecture and Environmental Design
- Conservation and Restoration of Cultural Heritage
- Traditional Turkish Arts

ABOUT

Our Vocational School was established by the decision of the General Assembly of Higher Education dated August 16, 2018, and began admitting students in the 2020-2021 academic year. Our program that will accept students starting in 2024 is "Interior Design".

Students who enroll will be considered to have completed the program requirements and will receive an associate degree upon completing a total of 120 ECTS credits over four semesters and fulfilling their mandatory internship requirements.
